Justice Reinvestment in Pennsylvania

Second Presentation to the Working Group

Carl Reynolds, Senior Legal and Policy Advisor
Marc Pelka, Deputy Director
Ed Weckerly, Research Manager
Patrick Armstrong, Policy Analyst
Dan Altman, Program Associate
The Council of State Governments Justice Center provides practical, nonpartisan advice informed by the best available evidence.

National nonprofit, nonpartisan membership association of state government officials that engages members of all three branches of state government.

Justice Center provides practical, nonpartisan advice informed by the best available evidence.
What is Justice Reinvestment?

A data-driven approach to reduce corrections spending and reinvest savings in strategies that can decrease recidivism and increase public safety.

The Justice Reinvestment Initiative is supported by funding from the U.S. Department of Justice’s Bureau of Justice Assistance (BJA) and The Pew Charitable Trusts.
Justice reinvestment includes a two-part process spanning analysis, policy development, and implementation.

### Pre-Enactment

<tbody>
<tr>
<td><strong>Victim Advocates Roundtable</strong></td>
<td>More than 20 participants from multiple organizations, including the Office of the Victim Advocate and Pennsylvania State Police</td>
</tr>
</tbody>
</table>
| **Surveys** |  - **Adult Probation** chief officers, deputy chiefs, supervisors/managers, and line officers were all invited to participate in an online survey  
  - **Working Group** members surveyed on areas of focus for the justice reinvestment project |
| **National Stepping Up Summit** | Teams from 3 counties (Allegheny, Berks, and Franklin) participated in the National Stepping Up Summit in Washington, DC, to help create or refine plans to reduce the prevalence of people with mental illness in jails |
| **CJAB Conference** | CSG Justice Center staff participated in last month’s Criminal Justice Advisory Board Conference in State College |
| **Stakeholder Calls** | 23 calls with stakeholders, including defense attorneys, prosecutors, judges, chief adult probation officers, judiciary committee members, and representatives from PCCD, DOC, PBPP, and the governor’s office |

Results of the working group survey to date indicate strong interest in pretrial, probation, access to services and outcomes.

Topics of highest interest:
- Bail and Pretrial
- Probation Practices and Outcomes
- Criminal History
- Race/Ethnicity
- Parole Decisions and Violators
- Behavioral Health Services
- Juvenile Justice

About half of the working group has responded to the survey so far.
Engaging victims and victim advocates in justice reinvestment

State Victim Advocate Jennifer Storm, CSG Justice Center staff, and National Victim Advocate Anne Seymour met with Pennsylvania victim advocates.

Roundtable Themes

- Victim should be able to receive information at the pretrial stage.
- Victim should receive notification about early accountability proceedings.
- Criminal justice professionals should receive training on victims’ rights.
- To help victims navigate a complicated system, available services and opportunities to provide impact statements at criminal justice system stages should both be mapped out.
- Victim restitution data (i.e., orders and collections) should be analyzed to assess how orders are managed—if data are available.
- Compensation eligibility, benefits, and utilization should be analyzed to determine whether the needs of victims are being met.
- Victims do not know about the services available to them.

Next Steps

- June and July regional meetings with victim services agencies and advocates.
- Additional data requests, policy review, and victim advocate input.
### Recap of March Presentation

Three-quarters of Pennsylvania’s criminal justice population is on county supervision and incarceration, but outcomes for this population are largely unknown.

</tbody>
</table>
Efforts to curb prison population growth have contributed to recent reductions, but state corrections spending has continued to climb, reaching $2.3 billion.
Pennsylvania has the highest rate of adults on parole supervision in the U.S., and parole violators account for nearly half of prison admissions.

Switch to **judicial proceedings** rather than criminal incidents to better reflect the volume of people being sentenced to different options. We use the terms **sentences** and **judicial proceedings** interchangeably throughout the presentation.

“A judicial proceeding includes all offenses committed by an offender that are sentenced on a given date. A judicial proceeding may contain a single criminal incident or multiple criminal incidents.”

- Look beyond just the most serious sanction to uncover **split sentences** that receive probation in addition to incarceration.

- **Philadelphia Municipal Court data**, including most misdemeanors, are not included in the sentencing analysis, and we estimate this amounts to about 15% of the state misdemeanor total.
Glossary of terms used in this presentation

**Prior Record Score (PRS)**—Score that depicts the seriousness and extent of an individual’s prior criminal record for use in the sentencing guidelines. Prior Record Scores range from 0 to 5 with two additional higher categories for repeat offenders, on the X axis of the sentencing guidelines grid.

**Offense Gravity Score (OGS)**—Score assigned to the gravity of the current conviction offense for use in the sentencing guidelines. Offense Gravity Scores range from 1 to 14 on the Y axis of the sentencing guidelines grid.

**Split Sentence**—A sentence that combines jail or prison incarceration with a probation sentence (or tail) following completion of incarceration and any parole period.

**County Intermediate Punishment (CIP)**—A direct sentencing alternative that consists of a restrictive intermediate punishment, such as a short jail stay or home confinement, and a restorative sanction/probation period.

**Drug and Alcohol Restrictive Intermediate Punishment (D&A RIP)**—A subgroup of CIP sentences and refers to the program established by PCCD that supports clinically prescribed drug and alcohol treatment for qualifying individuals through a state appropriation. D&A RIP funds support assessment, evaluation, treatment, case management, and supervision services, specifically for offenders falling under Levels 3 or 4 of the sentencing guidelines.

**Evidence-Based Practice (EBP)**—EBP is the objective, balanced, and responsible use of current research and the best available data to guide policy and practice decisions. Used originally in the health care and social science fields, evidence-based practice focuses on approaches demonstrated to be effective through empirical research rather than through anecdote or professional experience alone.
Overview

1. Relevant Trends
2. Sentencing Choices
3. Strengthening Supervision
Almost all reported crime is trending downward.
Part I property arrests have increased, driven by arrests for theft.
Within Part II arrests, the most notable increases were among drug and DUI.

A combined additional 7,900 arrests compared to 2005.

Crime in Pennsylvania Annual Uniform Crime Reports

* "Other" includes crimes not specified by the FBI as Part I or Part II, such as: Blackmail; bribery; contempt of court; perjury; contributing to juvenile delinquency; possession of burglar’s tools, drug paraphernalia, or obscene materials; public nuisances; trespassing; some weapons possession; and violations of state regulatory laws and municipal ordinances.
Sentences for drug offenses had the largest growth in the last ten years, while property and ‘other’ offenses also increased.

Increases in property and drug offenses constituted 73% of the 10,544 increase in total judicial proceedings from 2005 to 2014.

Section One Recap

Although total reported crime is down, arrests for property and drug offenses increased.
• Part I violent crime fell 20 percent and property crime dropped 12 percent.
• Increases in theft, drug, and DUI accounted for 19,590 additional arrests in 2014 compared to 2005.

Property and drug offenses drove the increase in sentences and comprise the majority of felony sentences.
• Between 2005 and 2014, the total number of judicial proceedings increased 13 percent.
• Property and drug offenses were responsible for 73 percent of the sentencing increase.
• In 2014, 61 percent of felony sentences were for property and drug offenses.

Most sentences fall into guideline levels that allow for most sentencing options.
• In 2014, 75 percent of sentences fell within guideline levels 3 and 4, which allow for sentences to probation, intermediate punishment, or incarceration.
Overview

1. Relevant Trends
2. Sentencing Choices
3. Strengthening Supervision
Incarceration is used for a substantial proportion of property and drug offense sentences.

1. State Funded D&A RIP only.
2. Average LOS for all offense types.
3. Legislative Budget and Finance Committee, Funding of County Adult Probation Services, February 2015.
4. Cost estimate based on blend of state and county funds.
5. Average statewide county jail cost per day in 2014.
6. Fully loaded cost per year.

Note that these cost estimates do not include the additional cost of post-incarceration supervision.
Geographic variation in sentencing can be explored through Pennsylvania’s county classification scheme.

Class 1 - Population of 1,500,000 or more
   Philadelphia County

Class 2 - Population of 800,000 to 1,499,999
   Allegheny County

Class 2A - Population of 500,000 to 799,999
   3 Counties (Bucks, Delaware, Montgomery)

Class 3 - Population of 210,000 to 499,999
   12 Counties (Berks, Chester, Cumberland, Dauphin, Erie, Lackawanna, Lancaster, Lehigh, Luzerne, Northampton, Westmoreland, York)

Class 4 - Population of 145,000 to 209,999
   9 Counties (Beaver, Butler, Cambria, Centre, Fayette, Franklin, Monroe, Schuylkill, Washington)

Class 5 - Population of 90,000 to 144,999
   7 Counties (Adams, Blair, Lawrence, Lebanon, Lycoming, Mercer, Northumberland)

Class 6 - Population of 45,000 to 89,999

Class 7 - Population of 20,000 to 44,999
   4 Counties (Juniata, Snyder, Union, Wyoming)

Class 8 - Population of less than 20,000
   6 Counties (Cameron, Forest, Fulton, Montour, Potter, Sullivan)
With the exception of Philadelphia, distribution of offense types within county classes is similar.

- Probation
- CIP
- Jail
- Prison
- Other

Use of prison sentences for property and drug offenses in Classes 3 through 8 is twice as high as 1 and 2.

Justice Center analysis of Pennsylvania Commission on Sentencing data.
People sentenced for property and drug offenses present the biggest challenge, and opportunity, for recidivism-reduction.

What we know about people convicted of property and drug offenses

- Property and drug crimes represent a large share of arrests and sentences, consuming law enforcement and court resources.

- They tend to have criminal records (higherPRS) but are convicted of nonviolent offenses (lower OGS).

- They may have significant criminogenic needs, including substance use and criminal attitudes, that must be addressed to prevent future criminal behavior. For example, among new property and drug admissions to prison in 2014, 68% had a substance abuse disorder indicator.

- Addressing these criminogenic needs presents resource challenges for criminal justice and behavioral health systems.

Justice Center analysis of Pennsylvania Commission on Sentencing data and PA DOC admissions data.
Total judicial proceedings increased 13 percent, with larger growth among probation and CIP sentences.

Justice Center analysis of Pennsylvania Commission on Sentencing data.

Sentencing data excludes Philadelphia Municipal court cases.
Depicting the most serious sanction masks an additional layer of split sentencing: to incarceration, plus probation.

Total Judicial Proceedings by Sanction Type, 2005 and 2014

- **2005**
  - Total Judicial Proceedings: 79,041
  - 37% Probation
  - 14% County Jail
  - 9% Jail+Probation
  - 3% Prison

- **2014**
  - Total Judicial Proceedings: 89,585
  - 40% Probation
  - 15% County Jail
  - 11% Jail+Probation
  - 4% Prison

- **2014 vs 2005**
  - Total growth: +10,544 (+13%)
  - Probation: +6,406 (+22%)
  - Jail+Probation: +2,257 (+21%)
  - County Jail: -3,625 (-17%)
  - Prison: +725 (+11%)

- **26% growth in sentences that include probation, most of which is served locally.**

*Justice Center analysis of Pennsylvania Commission on Sentencing data.*

*Sentencing data excludes Philadelphia Municipal court cases*
Growing volumes of split sentences add significant supervision time on top of a likely parole period.

Proportion of jail sentences with a probation tail

- Median Jail Min: 3 months
- Median Parole Window: 1 year
- Median probation tail for split jail sentences: 2 years

Proportion of prison sentences with a probation tail

- Median Prison Min: 2 years
- Median Parole Window: 2.7 years
- Median probation tail for split prison sentences: 3 years

Justice Center analysis of Pennsylvania Commission on Sentencing data.

Sentencing data excludes Philadelphia Municipal court cases
A third of felony straight probation sentences and half of felony prison split sentences have probation terms over three years in length.

Additional note: 38% of Pennsylvania misdemeanor probation terms are longer than one year.

Justice Center analysis of Pennsylvania Commission on Sentencing data.

Sentencing data excludes Philadelphia Municipal court cases.
The likelihood of recidivism is highest in the first year on supervision and decreases in each subsequent year.

Likelihood of failure on supervision is highest in the first year, and declines in each subsequent year.

Figure 7: 5-Year Recidivism Rates in Pennsylvania (2006 Releases)

- 25% re-arrested within 1 year of release
- 1–2 years: 15%
- 2–3 years: 11%
- 3–4 years: 7%
- 4–5 years: 3%

Section Two Recap

Large proportions of sentences to jail and prison are for property and drug offenses.
• 45 percent of sentences to prison and 63 percent of sentences to jail are for property and drug offenses.

Incarcerating property and drug offenses costs taxpayers more than $500 million per year.
• Although offenses comprising sentences are similar across most counties, the utilization of probation varies considerably.
• Allegheny County sentences property and drug offenses to probation at almost twice the rate of other county classes.

Growing volumes of split sentences layer significant supervision periods onto incarceration and likely parole periods.
• Between 2005 and 2014, the number of sentences including additional probation periods increased 26 percent.
• The likelihood of recidivism is highest in the first year on supervision and decreases in each subsequent year.
• A third of felony probation sentences and half of prison split sentences include probation terms exceeding three years.
Overview

1. Relevant Trends
2. Sentencing Choices
3. Strengthening Supervision
County probation/parole caseloads are high, and the supervision population is on the rise.
Risk-Need-Responsivity principles are key to containing costs and reducing recidivism.

Traditional Approach

- Supervise everyone the same way
- Assign programs that feel or seem effective
- Deliver programs the same way to everyone

Evidence-Based Practices

- Assess risk of recidivism and focus supervision on those with the highest-risk
- Prioritize programs addressing the needs most associated with recidivism
- Deliver programs based on individual learning styles, motivations, and/or circumstances
Risk assessment should lead to sorting the population by risk, and focusing resources and effort on the higher-risk population.

Assess Population for Risk

Determine Appropriate Supervision Levels

Focus Resources on Higher-risk Populations

<table>
<thead>
<tr>
<th>Risk of Recidivism</th>
<th>Low 10% re-arrested</th>
<th>Moderate 35% re-arrested</th>
<th>High 70% re-arrested</th>
</tr>
</thead>
</table>

Jordan M. Hyatt, JD PhD and Geoffrey C. Barnes, PhD, Evidence Based Practices (EBP) & Workload Analysis: Survey Results, April 2015
Targeting criminogenic, dynamic risk factors is essential to reducing recidivism.

The most successful supervision and programming models will address these three dynamic risk factors. The fourth, past antisocial behavior, cannot be changed.

Big Four Antisocial Risk Factors
Higher-risk individuals are likely to have more of these major drivers in criminality.
Swift and certain responses to violation behavior are also critical to population management in jail and prison, and recidivism reduction.

**Hawaii HOPE**
Intensive, random drug testing with swift, certain, and brief jail sanctions to supervision violations.

**Georgia POM**
Prompt sanctions to correct behavior of troublesome Probationers.

**North Carolina**
Swift and certain “dips” of brief jail sanctions and “dunks” of prison sanctions in response to violations.

Research shows that behavior modification requires four positive responses for every negative response.

**INCENTIVES:** Responses to supervision compliance can reduce recidivism as much as or more than sanctions, when the probationer/parolee is aware of them.

<table>
<thead>
<tr>
<th>Modify supervision level</th>
<th>Modify restrictiveness of conditions</th>
<th>Modify travel restrictions</th>
<th>Verbal praise</th>

</thead>
</table>

**SANCTIONS:** The most restrictive responses available should be prioritized based on probationers’ risk level and the seriousness of violation.

P. Gendreau, P. & C. Goggin, Correctional Treatment: Accomplishments and Realities, Correctional Counseling and Rehabilitation, edited by P. V. Voorhis, M. Braswell and D. Lester (Cincinnati, OH: 1997)
Survey of officers and chiefs shows opportunities for assessment, programming, and responding to violations.

**Evidence-Based Practice**

- Assess probationers’ criminogenic needs
- Deliver programs addressing antisocial thoughts, peers, and attitudes
- Elicit positive responses and engage in the behavioral change process

**Survey Responses**

- 26% reported that risk assessments are conducted on all cases. 40% reported that assessment has been validated.
- 63% reported their department does not provide any cognitive therapy to individuals.
- 59% reported their department does not have a written policy on the use of rewards & incentives to encourage positive behavior.

534 probation chiefs and officers responded to the survey. Snyder, Sullivan, and Juniata counties did not have a respondent.

*Jordan M. Hyatt, JD PhD and Geoffrey C. Barnes, PhD, Evidence Based Practices (EBP) & Workload Analysis: Survey Results, April 2015*
Pennsylvania has a high proportion of misdemeanor probationers and high caseloads.

In 2014, 60% of Pennsylvania probationers were misdemeanants, the sixth highest percentage among 43 states. The national average was 38%.

Average active caseload size among probation officers respondents was 132.

Among those that indicated that more than half of their caseload was high risk, 59% reported spending less than half of their week in direct contact with probationers.

The large volume of misdemeanants on probation can present a challenge when trying to focus supervision on those with higher risk and more serious offenses.
Pennsylvania has standards, auditing, and data collection, but opportunities exist for state policies to strengthen supervision.

Current Approach

PBPP has 173 county adult probation standards. Of the 57 standards audited in FY2014, 42 were deemed non-applicable for many counties.

Audits of departments are conducted annually to assess compliance with one-third of the standards.

Grant-in-aid funding may be withheld for county departments that are not in compliance with standards.

Most known information on probation comes from survey information reported annually in the CAPP report.

Opportunities for Improvement

Prioritize the probation standards that are most related to effective probation policy and practice.

Provide training and strategic support for counties that are not meeting standards.

Increase financial incentives for compliance with prioritized standards.

Enable case-level data analysis, tracking of trends, and focus on progress toward adopting evidence-based practices.
Pennsylvania is one of ten states with county-administered probation, which presents a challenge.

At both the state and county levels, probation systems are housed in either the executive or judicial branch.
The structure of CIP and D&A RIP resembles approaches in Ohio and Texas, but those states invest much greater state funding.

Are CIP and D&A RIP models that Pennsylvania could build upon to provide sentencing options for probationers who otherwise would receive a sentence to incarceration?
Efforts to strengthen supervision are gaining momentum in Pennsylvania.

High caseloads present challenges to county supervision departments.
- Probation officers’ survey responses indicate that high caseloads present challenges to delivering adequate dosage of supervision.
- People with misdemeanor sentences comprise a larger share of the probation population in Pennsylvania than most other states.

Adoption of evidence-based practices would help focus resources on higher-risk probationers.
- Research shows that assessing for risk of recidivism, focusing resources on high risk probationers, and responding to behavior with swiftness and certainty helps lower recidivism.
- A number of efforts are underway to strengthen county supervision in Pennsylvania.

Although state funding for CIP is comparatively low, it delivers intensive supervision and treatment to a population that otherwise would be likely bound for incarceration.
- Other states with county-administered probation invest more in intensive supervision and treatment to avoid incarceration costs and lower recidivism.
- CIP, a similar approach used in Pennsylvania, received 10,000 sentences in 2014.
Section One
• Although total reported crime is down, arrests for drug and some property offenses have risen.
• Property and drug offenses drove the increase in total sentences over the past 10 years and comprise the majority of felony offense types.
• Three-quarters of sentences fall into guideline levels that allow for most sentencing options.

Section Two
• Large proportions of sentences to jail and prison are for property and drug offenses.
• Incarcerating property and drug offenses costs taxpayers over $500 million per year.
• Growing volumes of split sentences layer significant supervision periods onto incarceration and likely parole periods.

Section Three
• High caseloads present challenges to county supervision departments.
• Adoption of evidence-based practices would help focus resources on higher-risk probationers.
• Although state funding for CIP is comparatively low, CIP delivers intensive supervision and treatment to a population that otherwise would be likely bound for incarceration.
