Improving Outcomes for Youth in Colorado

Second Presentation to Task Force: Assessment Findings
July 23, 2018

CSG Justice Center Presenters:
- Nancy Arrigona, Research
- Shanelle Johnson, Juvenile Justice
- Nina Salomon, Juvenile Justice
About The Council of State Governments (CSG) Justice Center

National nonprofit, nonpartisan, membership association of state government officials that engages members of all three branches of state government.

Provides practical, nonpartisan research-driven strategies and tools to increase public safety and strengthen communities.
About the National Reentry Resource Center

- Authorized by the passage of the Second Chance Act in April 2008
- Launched by The Council of State Governments (CSG) Justice Center in October 2009
- Administered in partnership with the U.S. Department of Justice’s Bureau of Justice Assistance and the Office of Juvenile Justice and Delinquency Prevention
Colorado has a history of state leaders being committed to improving outcomes for youth in the juvenile justice system.

- Commitment to transparency and improvement
- Adoption and implementation of SB94 and reduction of detention bed admissions
- Expansion of the Collaborative Management Program to provide funding or youth and families involved with multiple agencies
- Improving conditions of confinement in Department of Youth Services facilities
- History of collaboration through the Juvenile Justice and Delinquency Prevention Council and the Colorado Criminal Justice Reform Coalition
Governor Hickenlooper launched IOYouth in May in partnership with Representative Lee, Justice Boatright, Senator Gardner, and Director Bicha.
A statewide task force oversees IOYouth to determine what steps can be taken to strengthen public safety and improve outcomes for youth.

1. **Based on data available** through the Department of Public Safety, Division of Criminal Justice, and the Department of Health Services, Division of Youth Services

2. **Data includes information on:**
   - Youth referred to and provided services through SB94
   - Youth screened for detention
   - Youth admitted to and released from detention
   - Appropriations and expenditures for SB94 and DYS detention

   **Details findings from:**
   - FY2013 to FY2017 for juvenile detention screens and youth detained
   - FY2015 to FY2017 for juveniles receiving SB94 services
   - 2012 to 2016 for juvenile arrests
Since the last IOYouth Task Force meeting in May, CSG Justice Center staff have spoken with a wide array of stakeholders.

**State and Local Agencies**
- DYS Leadership and Staff
- Client Managers
- County DHS Leadership
- Department of Corrections Leadership
- Diversion Directors
- SB94 Coordinators
- Colorado Child Protection Ombudsman
- Colorado Public Education Department

**Court System**
- Juvenile Court Judges/Magistrates
- District Attorneys
- Public Defenders
- Juvenile Probation
- Probation Youth and Families

**DYS Facilities**
- Lookout Mountain YSC Leadership and Staff
- Platte Valley YSC Leadership and Staff
- J. Paul Taylor Center Supervisors and Staff
- Grand Mesa YSC Leadership and Staff
- Zebulon Pike YSC Leadership and Staff
- Mount View YSC Leadership and Staff
- Adams YSC Leadership
- Gilliam YSC Leadership
- Facility Youth and Families

**Other Stakeholders**
- Law Enforcement
- Colorado Municipal League
- Community and Residential-based Providers
The CSG Justice Center staff have gathered feedback from stakeholders across the state to ensure a diversity of perspectives.

Since February 2018...

- 4 Site visits – 1 to each DYS region
- Calls and meetings with more than 100 individuals
- 6 Facility Visits
The following goals and context help guide the IOYouth assessment in Colorado:

- The goal of the assessment is to identify key barriers to improving outcomes for youth and advance policy, funding, and practice changes to address these barriers.
- The assessment shows what is happening in Colorado’s juvenile justice system and whether policies and practices are aligned with what research shows works to improve outcomes for youth.
- Most, if not all, juvenile justice systems struggle to prevent youth from reoffending.
- Every state with which the CSG Justice Center has partnered struggles to match youth with the appropriate level, type, and quality of supervision and services.
- The CSG Justice Center commends state and local agencies for their transparency, willingness to have their challenges publically reviewed and discussed, and their commitment to improvement.
01 IOYouth Assessment Process

02 Assessment Results
   • Diversion
     • Who is getting arrested?
     • Who is getting diverted?
     • What happens to youth on diversion?
   • Detention

03 Next Steps
What does the research say about Diversion?

- Court involvement for low-risk youth often does more harm than good and takes limited resources away from focusing interventions on youth who are a threat to public safety.

- Most low risk youth, without court involvement, grow out of their behavior and stop reoffending without system intervention.

- Diversion is a more cost effective public safety strategy than court processing for low risk youth.

- Youth’s current offenses are a poor predictor of a youth’s risk to reoffend.

- Restorative justice practices are an effective way to hold youth accountable for repairing the harm caused to victims and communities and can reduce reoffending and increase victim’s satisfaction with the justice system.
DIVERSION ASSESSMENT FINDINGS

Who is Getting Arrested?
Juvenile arrests have declined 18 percent between 2012 and 2016, with arrests for violent offenses increasing slightly.
Black youth make up a small proportion of juvenile arrests but are almost three times more likely to be arrested than White youth.
Youth arrested or served a summons may be directed to municipal or district court, depending on offense, and may be diverted pre- or post-filing of their case.
DIVERSION ASSESSMENT FINDINGS

Who is Getting Diverted?
Colorado lacks a centralized approach to tracking diversion participation, services, and outcomes.

- There is no statewide data system or entity responsible for collecting, tracking, or evaluating diversion data.

- There is no comprehensive picture of how many youth get diverted statewide, who gets diverted, and diversion outcomes.

- The Department of Criminal Justice (DCJ) collects data on diversion programs funded through the DCJ grant, however, this represents only a subset of youth that are diverted.

### From DCJ FY2016-2017 Evaluation

- 19 grant awards
- 1350 youth began diversion
- More than 50% were for misdemeanor offenses
- More than 2/3 were result of property, theft or drug charges
- Majority male, White, or Hispanic
The CSG Justice Center conducted a survey of all judicial districts to better understand diversion programs across the state.

Survey questions:
- Structure and oversight
- Eligibility criteria
- Programming and services
- Funding sources
- Data collection

Survey sent to all 22 judicial districts to district attorneys and diversion directors in Colorado

21 responses

According to the survey, at least 2800 youth started diversion in FY2017, more than double the number in the DCJ evaluation.
District attorney offices administer the majority of juvenile diversion, with most jurisdictions offering diversion pre- and post-filing.

In six JDs, multiple entities oversee diversion programs. Three JDs do not administer juvenile diversion programs due to a lack of resources or too few kids eligible.
A variety of funding sources are used to support juvenile diversion programs.

</tr>
</tbody>
</table>

12 judicial districts use multiple funding sources to fund diversion programs in their jurisdictions. In three judicial districts, juvenile diversion is funded solely by the district attorney’s office.
Eligibility criteria for diversion varies significantly across the state.

- Broad statutory authority is provided to judicial districts to determine eligibility criteria for diversion

- Districts do not see a lot of diversion failures as most diversion youth are first time low level offenders

- Family support and stability is often a factor in determining youth eligibility, and some districts require families to pay for participation in diversion

- Cases are often times formally filed in order to get other services for youth, like psychiatric evaluations, and JDs can always divert later

- Youth identified or perceived to have higher needs are often not diverted because of limited resources for services
Judicial districts report using a variety of factors to determine a youth’s eligibility for diversion.

</tbody>
</table>

Other refers to victim input and youths’ amenability to treatment.
DIVERSION ASSESSMENT FINDINGS

What Happens to Youth on Diversion?
Diverted youth are usually supervised by a case manager or diversion officer, and average 6 months or more on supervision in nearly half of districts.

**Average Number of Monthly Contacts with a Case Manager**

- 0: 2
- 1: 3
- 2: 6
- 3: 2
- 4+: 4

**Average LOS on Diversion**

- 3-6 Months: 9
- 6-9 Months: 6
- 9 Months - 1 Year: 2
In most districts, diverted youth are required to participate in services and programming.

Judicial districts report a variety of programming and services available to youth on diversion, including education, restorative justice, restitution, community service, and treatment.

Services are often paid for by youth and families directly or through insurance, in addition to some funds used by the DA’s offices and grant programs.
Overall juvenile arrests are declining, however local discretion in arrest and referrals to court can lead to inconsistencies further in the juvenile justice system.

The structure and implementation of juvenile diversion varies significantly across jurisdictions in Colorado, resulting in inconsistent adherence to best practice and limited data on performance.

Youth who are diverted from formal court involvement still receive substantial system supervision and services.
Best Practices in Juvenile Diversion

- Divert lower risk youth from system involvement; provide minimal or no supervision for these youth; and focus limited resources on supervision/services for youth with a high risk of reoffending.

- Use risk screening tools to objectively identify low risk youth that are appropriate for diversion.

- Establish clear criteria to identify youth that should be eligible for and/or automatically participate in diversion programs.

- Use needs screening tools to identify youth with potential mental health and substance use needs to match youth with appropriate services.

- Collect data on diversion program participation and quality to evaluate performance.
01  IOYouth Assessment Process

02  Assessment Results
   •  Diversion
   •  Detention
     •  Who is getting detained?
     •  How long are youth staying in detention?
     •  Are youth in detention/alternatives getting needed services?

03  Next Steps
Research demonstrates that detention can have a negative impact on young people’s mental and physical well-being, and when used inappropriately, detention may make it more likely that youth will reoffend.

Youth who are detained are more likely to penetrate deeper into the juvenile justice system than similar youth who are not detained.

Detention alternatives should be based on the principle of using the least restrictive setting possible and on identifying and addressing youth’s needs as identified from validated screening tools.
DETENTION ASSESSMENT FINDINGS

Who is Getting Detained?
Between 2013 and 2017, detention admissions declined by 18 percent while the juvenile age population increased 5 percent.
Males represent 2/3 of new detention admissions, and minority youth comprise more than 60 percent of new detention admissions.
Discretion in judicial district policies can lead to the placement of youth in secure detention that are not a public safety risk.

- The JDSAG is used statewide to screen youth for detention eligibility; however, screening policies and override guidelines are most often determined by the chief judge.

- In most judicial districts, youth with warrants are automatically detained regardless of public safety risk or risk of reoffense.

- Some magistrates report not always getting all of the information that they need in order to make detention decisions.

- The lack of collaboration in some districts across youth serving agencies can lead to more youth being placed in secure detention.
More than 2/3 of youth screened on the JDSAG receive a mandatory hold to secure detention, but more than half are not identified as a public safety risk.

Of youth screened in FY2017 with a Mandatory Hold:

- 52% were NOT considered a public safety risk
- 45% had committed a misdemeanor or lesser offense
- 34% were low risk
- 68% had a responsible adult to provide supervision if released
Almost half of detention admissions are the result of a violation, the majority of which are for a failure to comply.

Detention Admissions by Detention Reason*, FY2013 and FY2017

**Type of Violation, FY2017**
- Failure to Comply: 66%
- Failure to Appear: 23%
- Probation Technical Violation: 11%
- Truancy VCO: <1%

*“other” detention reason accounted for 1% of in both FY13 and FY17, missing not included
More than 1/3 of youth who screen to a level below secure detention on the JDSAG still end up in secure detention.

DETENTION ASSESSMENT FINDINGS

Are youth in detention/alternatives getting needed services?
Many jurisdictions cite a lack sufficient alternatives to detention in the community, which results in inappropriate placements.

- Many judicial districts report a lack of less secure alternatives to detention, including the use of shelters beds, residential placements, foster care, etc.

- Youth with significant mental health needs, low cognitive abilities, and other more intensive needs often end up in detention due to a lack of alternative placements.

- Youth who fail out of DHS placements often penetrate into the detention system.

- SB94 is often used by jurisdictions to also assess and provide services to youth that are on probation, committed, or diverted, stretching resources.

- Youth are often detained to receive assessments/evaluations and to coordinate service delivery at release.
Youth that are diverted, committed, or that receive violations are often referred to SB94 for assessment, however in half of these cases services are found not to be needed by youth.

% of SB94 Cases Found Not in Need of Services by Legal Status, FY2017

- Committed: 51%
- Diversion: 50%
- VCO: 42%
- Sentenced: 17%
- Preadjudicated: 15%
- Municipal: 10%

SB94 Case LOS (days) by Outcome, FY2017

- SB94 Case Did Not Need Services: 11.16 days
- All Other Outcomes: 56.79 days

Council of State Governments Justice Center | 55
In FY2017, less than half of SB94 resources allocated by DYS provided direct services to youth.

**SB94 Allocation and Cases Started, FY2015 and FY2017**

- FY15: $8,247 million
- FY16: $7,742 million
- FY17: $7,520 million

**Average Cost per SB94 Case Started, FY15 and FY17**

- FY2015: $1,476
- FY2017: $1,647

**SB94 Allocation by Service Type, FY17**

- Direct Support: 34%
- Supervision: 27%
- Assessment: 22%
- Treatment / Restorative: 8%
- Plan Admin: 9%
Client assessment/evaluation is the most frequent type of service provided to youth through SB94.

22% of SB94 cases are for assessments/evaluations only, and do not involve any services.

Assessment/evaluation can include medical, mental health, substance use, CJRA pre-screen and/or full assessment, JDSAG, psychological, among others.
Jurisdictions lack protocols to ensure that youth served through SB94 have their needs accurately identified and met.

Youth with identified substance use needs received the same level of SB94 services as youth without an identified need.
At least one-third of youth detained in FY2017 were identified as having substance use, mental health, or trauma related needs.

* As identified by the CJRA Screen
Females entering detention have higher identified needs than males.

**Mental Health Need, Substance Use Disruption, and History of Abuse/Neglect by Gender, FY2017**

- **MH Need**: 36% Male, 49% Female
- **SU Disruption**: 33% Male, 39% Female
- **Abuse/Neglect**: 26% Male, 43% Female
White youth in detention are identified as having higher needs than minority youth.

Mental Health Need, Substance Use Disruption, and History of Abuse/Neglect by Race/Ethnicity, FY2017

- **MH Need**
  - Hispanic: 29%
  - Black: 29%
  - White: 54%

- **SU Disruption**
  - Hispanic: 29%
  - Black: 33%
  - White: 39%

- **Abuse/Neglect**
  - Hispanic: 23%
  - Black: 29%
  - White: 37%
Youth in secure detention have high needs, but do not always have access to services and treatment that address their needs.

- Services in secure detention are often only meeting youths’ basic needs.

- Services in secure detention are meant to be short-term; however, youth with longer LOS often do not receive the services or treatment that they need and typically repeat programs.

- Staff report that they do not receive the necessary trauma-informed training to support the needs of youth that are in detention.

- Youth often are unable to start receiving more intensive mental health treatment while in secure detention and typically just receive psycho-social evaluations and/or crisis stabilization services.
Diversion: Key Assessment Findings

1. A significant proportion of youth that are detained are not identified as a public safety risk and detention rates vary substantially by district and youth demographics, in part due to discretion in how youth are referred for screening and how the screening tool is used across districts.

2. Lengths of stay in detention vary significantly based on judicial district and youth demographics, with males, Black youth, and those involved with the child welfare system having the longest stays.

3. Districts are not fully using SB94 to provide needed detention alternatives, and more generally, SB94 is not being used efficiently to target specific youth and identify and address their needs. At the same time, youth who are detained are not receiving needed services.
Best Practices in the Appropriate Use of Detention

- Reserve costly secure detention beds for youth who are a direct risk to public safety or flight risk.

- Establish specific criteria, policies, and training on the use of detention screening instruments, overrides, and secure vs. alternative vs. no detention.

- Establish a continuum of alternatives to detention supervision and services in the community matched to the risks and needs of youth.

- Limit the use of detention as a response to technical violations or failures to comply with supervision, unless youth are at imminent risk of harming themselves or others.

- Develop strategies to better understand and expressly address racial and other types of disparities in the use of and lengths of stay in detention.

02 Assessment Results
   • Diversion
   • Detention

03 Next Steps
Immediate Next Steps

1. Establish working groups focused on diversion and detention to develop policy recommendations for full task force consideration *(July/August)*

2. Present assessment findings related to disposition, probation, commitment, and placement to the task force *(September 6)*

3. Establish working groups focused on disposition/supervision to develop policy recommendations for full task force consideration *(September/October)*

4. Reach consensus as a task force around policy options to translate into legislation *(October 31)*
Diversion and Detention Working Groups’ Timeline & Next Steps

**July 24**
- In-person meeting to review findings, identify priorities, and begin discussing recommendations

**Mid-August**
- In-person meeting to solidify recommendations for the full task force

**Week of August 27**
- Conference call to prepare for the full task force presentation

**September 6**
- Presentation of recommendations to full task force
IOYouth timeline and next steps

- **April**: Initial Data Analysis
- **May**: Detailed Data Analysis
- **June**: Final Data Analysis
- **July**: Impact Analysis
- **Sep**: Task Force Meeting #1
- **Oct**: Task Force Meeting #2
- **Nov**: Task Force Meeting #3
- **Dec**: Task Force Meeting #4
- **2019 Session**: Policy Rollout and Bill Introduction

**Stakeholder Engagement**
- **April**: Project Launch
- **May**: Task Force Meeting #1
- **June**: Task Force Meeting #2
- **July**: Task Force Meeting #3
- **Sep**: Task Force Meeting #4
- **Oct**: Stakeholder Engagement
- **Nov**: Policy Option Development
- **Dec**: Bill Drafting

**Policymakers, Media and Stakeholder Engagement**
