Using Local Innovation to Address Racial Disparities in Behavioral Health and Criminal Justice Programs

September 20, 2022 | 2–3:30 p.m. ET | National League of Cities
Presentation Outline

I. Welcome and introductions

II. Strategies to decrease racial disparities and implement programs with equity

III. Local examples of prioritizing race equity in the development of criminal justice and behavioral health programs

IV. Facilitated discussion with local leaders

V. Questions and answers
Speakers

• Jazmone Wilkerson, *Project Manager, Behavioral Health, CSG Justice Center*

• Felicia Lopez Wright, *Senior Policy Analyst, Behavioral Health, CSG Justice Center*

• Kirby Gaherty, *Program Manager, Justice Initiatives, National League of Cities (NLC)*

• Tony McCright, *Senior Specialist, Justice Initiatives, NLC*
Speakers

- Julia Martin, Assistant to the City Manager, City of Charlotte
- Federico Rios, Assistant Director, Housing and Neighborhood Services Department, City of Charlotte
- Taylor Crouch-Dodson, Program Manager, Office of Performance and Innovation, City of Minneapolis
- Wilford Pinkney, Director of the Mayor's Office of Children, Youth, and Families, City of St. Louis
The Council of State Governments Justice Center

We are a national nonprofit, nonpartisan organization that combines the power of a membership association, serving state officials in all three branches of government, with policy and research expertise to develop strategies that increase public safety and strengthen communities.
How We Work

- We bring people together
- We drive the criminal justice field forward with original research
- We build momentum for policy change
- We provide expert assistance
Our Goals

Break the cycle of incarceration
High rates of recidivism increase taxpayer costs, diminish public safety, and tear apart families and communities. We work with partners inside and outside of government to reduce crime and incarceration among youth and adults in contact with the justice system.

Advance health, opportunity, and equity
Efforts to make communities safer and healthier are hampered by insufficient behavioral health services, barriers to economic mobility, homelessness, lack of support for victims, and racial and gender inequity. We bring people from diverse systems and perspectives together to improve policy and practice related to these challenges.

Use data to improve safety and justice
Data holds the power to help us understand and change justice systems for the better. And yet, states and counties still know far too little about how their systems perform. Our work transforms information into meaningful insights for policymakers.
The Council of State Governments Justice Center is committed to advancing racial equity internally and through our work with states, local communities, and Tribal Nations.

We support efforts to dismantle racial inequities within the criminal and juvenile justice systems by providing rigorous and high-quality research and analysis to decision-makers and helping stakeholders navigate the critical, and at times uncomfortable, issues the data reveal. Beyond empirical data, we rely on stakeholder engagement and other measures to advance equity, provide guidance and technical assistance, and improve outcomes across all touchpoints in the justice, behavioral health, crisis response, and reentry systems.
The U.S. Department of Justice Bureau of Justice Assistance

Mission: BJA’s mission is to provide leadership and services in grant administration and criminal justice policy development to support state, local, and Tribal justice strategies to achieve safer communities. BJA works with communities, governments, and nonprofit organizations to reduce crime, recidivism, and unnecessary confinement, and promote a safe and fair criminal justice system.
Justice and Mental Health Collaboration Program

The Justice and Mental Health Collaboration Program (JMHCP) promotes innovative cross-system collaboration and provides grants directly to states, local governments, and federally recognized Indian Tribes. It is designed to improve responses to people with mental health conditions and substance use disorders who are involved in the criminal justice system.
National League of Cities’ Justice Initiatives Institute for Youth, Education, and Families

IYEF

The Institute for Youth, Education, and Families (IYEF) is the go-to place for city leaders seeking to improve outcomes for children and families. With expertise in early childhood success, education & expanded learning, promoting a culture of health, youth & young adult connections, and economic opportunity & financial empowerment, the YEF Institute reaches cities of all sizes and brings together local leaders to develop strategies via technical assistance projects, peer learning networks, leadership academies, and Mayors’ Institutes.

Justice Initiatives Team

• Builds on the work of the Reimagining Public Safety Task Force
• **Technical Assistance:**
  • Reducing Harm through collaborative solutions
  • Municipalities reimagining community safety
• **Peer Learning Networks**
  • City Justice Policy Advisors Network (CJPAN)
  • Young Adult Justice Community of Practice (YAJCOP)
  • Municipal Reentry Leaders Network (MRLN)
Objectives

• Understand how racial equity is linked to the social determinants of health and diminished opportunities.

• Define and understand the importance of implementing a racial equity lens into their programs.

• Understand how to use race equity data to implement program change.

• Learn from local leaders how to apply a racial equity lens in services and diversion opportunities.

• Obtain strategies to address racial disparities through local equitable innovation.
Presentation Outline

I. Welcome and introductions

II. Strategies to decrease racial disparities and implement programs with equity

III. Local examples of prioritizing race equity in the development of criminal justice and behavioral health programs

IV. Facilitated discussion with local leaders

V. Questions and answers
Racial Equity Defined

Racial equity is both an outcome and a process. As an outcome, we achieve racial equity when race no longer determines one’s socioeconomic outcomes and when everyone has what they need to thrive, no matter where they live. As a process, we apply racial equity when people most impacted by structural racial inequity are meaningfully involved in the creation and implementation of the institutional policies and practices that impact their lives.

Racial Equity and Opportunity

• **Every community is hindered by systemic racial inequities.** Even in the states that are doing the best at racial equity, there are significant and preventable racial inequities.

• **Inclusive prosperity remains elusive among America’s metros and cities.** It is very rare for communities to have high levels of prosperity and high levels of inclusion.

Social Determinants of Health (SDOH)

SDOH Impacts on BIPOC

• BIPOC experience higher rates of poverty.
• Poverty is a main risk factor that can predict the likelihood of being detained and remaining incarcerated.
• Combined with increased policing in communities of color, biases in prosecutorial discretion, and sentencing policies, BIPOC represent a disproportionately high percentage of people who are incarcerated.
• “Racial disparities in incarceration cause disproportionate economic, health, and social harms to communities of color.”—Vera Institute

Importance of Racial Equity in Criminal Justice and Behavioral Health Programming

- Criminal justice and behavioral health systems have not provided equitable outcomes for BIPOC communities/communities of historic divestment.
  - Historical mistrust of behavioral health systems by BIPOC due to racism, pathologizing of racial/cultural differences, and misdiagnosis
- People most harmed by these systems historically must now be at the table (planning, implementation, sustainability).

Racial Equity Data

- Must look at the root cause of disparities in justice involvement—arrests and sentencing—to understand how to make progress.
- Examine the link between the social determinants of health outcomes and those involved in the justice system with mental health conditions.
- Building a more equitable justice system starts from within the community.

Racial Equity Criminal Justice and Behavioral Health Analysis

Choice Points defined

- **Examples:**
  - Connecting people to community-based supports
  - Arrest
    - Community alternatives i.e., treatment, etc.
  - Sentencing
    - Diversion opportunities
    - Equitable sentencing structures
  - Post-incarceration decisions
    - Probation or parole, violation decisions
    - Connections to community supports that can provide increased opportunities to promote stability and entry back into communities

Racial Equity Criminal Justice and Behavioral Health Analysis

Choice Points

- Example Questions:
  - Where are the decision-making points that affect racial inequality?
  - What decisions/actions may reenforce the status quo, implicit bias, and current inequities?
  - What are some alternative actions that could produce equity? Which action will best advance equity?
  - What supports or accountability systems can be structured into routine practices to center equity as a priority?

Strategies to Decrease Racial Disparities

- **EQUITY CANNOT EXIST WITHOUT INCLUSION**
- Consider creating or adopting racial impact assessments.
- Acknowledge the cumulative nature of racial disparities.
- Encourage communication across players in all decision points of the system.
- Know that what works at one decision point may not work at others.
- Work toward systemic change.
- Equitable implementation works to address cultural, systemic, and structural norms that privilege some groups over others.

V. Questions and answers
City Leaders
SAFE Charlotte Plan

Office of Equity, Mobility & Immigrant Integration

Violence Interruption & Civilian Response
Equity, Mobility and Immigrant Integration (EMII)

In 2019, the City of Charlotte formed its Office of Equity, Mobility and Immigrant Integration (EMII) to address systemic and community barriers that limit opportunities for Charlotte’s vulnerable communities.

- Key Program Area: Addressing Community Violence
  - Policing alone will not solve violent crime or its underlying causes. So, the City of Charlotte, Mecklenburg County, and partners are taking a public health approach to violence prevention. This approach includes an analysis of research, putting findings in the context of our community, and incorporating the perspectives of people most impacted by the issue. Charlotte is taking a public health approach (via SAFE Charlotte & more).
  - In February, Council confirmed this approach by adopting a framework to address violence that can be used to guide policies, practices, and programs. This approach will be used in areas that were identified as having the highest concentration of violent crime over time. One component of this work is sharing data between agencies and with the community through the Community Violence Dashboard.
Framework to Address Violence

Purpose: City, County, Partners, and Community work together to reduce violence, increase economic opportunity, and build healthier, more resilient communities—with a race equity focus.

Using Local Innovation to Address Racial Disparities in Criminal Justice Programs
The City of Charlotte has solidified and implemented public safety policy improvements developed through conversations with residents and community leaders. We understand that a safer Charlotte goes beyond changes to policing and public safety. **It means tackling systemic issues to ensure a community of equity and opportunity.** Taking a holistic approach, we have rolled up our sleeves to address such intertwined factors as unemployment, housing, transportation, and workforce development.
SAFE Charlotte Reimagining Policing Recommendations

- **Recommendation 1** – Provide $1M from the city’s current budget to help Charlotte-based nonprofits address violence in the community.

- **Recommendation 2** – Work with an external partner to develop a comprehensive recommendation to convert low-risk sworn duties to non-uniform officers.

- **Recommendation 3** – Work with an external partner to provide an independent analysis of areas such as police-civilian contact and police calls and responses.

- **Recommendation 4** – Expand Community Policing Crisis Response Team (CPCRT) and develop a nonsworn officer responder model for mental health and homeless calls.

- **Recommendation 5** – Engage a university or independent organization to evaluate selected youth programs on an annual basis.

- **Recommendation 6** – Enhance recruitment efforts and develop a program to provide additional residency incentives to officers living in priority areas, including down payment incentive.
Minneapolis—Behavioral Health Crisis Response
OPI’s Inclusive Design Process

Context

In November 2020, the Office of Performance & Innovation presented a series of unarmed public safety recommendations in response to a Council directive asking staff to **identify and design alternatives to police responses**.

Those unarmed public safety pilots include:

- Launch the Behavioral Crisis Response (BCR) team to handle mental health crisis calls via 911 instead of police.
- Embed a mental health professional in 911 to assist with call triage.
- Shift additional non-emergency calls from 911 to 311.
- Establish an overnight shift for Traffic Control to handle overnight parking issues instead of police.
- Run a media and print campaign to increase awareness of the city’s unarmed public safety solutions.
## Racial Equity Supports and Barriers

<table>
<thead>
<tr>
<th>Supports</th>
<th>Barriers</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Nature of OPI’s work and use of our inclusive design process</td>
<td>• Institutional racism and resistance</td>
</tr>
<tr>
<td>• Collected demographic information</td>
<td>• Desire to use predetermined solutions that are a different version of the status quo</td>
</tr>
<tr>
<td>• Analyzed racially disaggregated data</td>
<td>• Time constraints/pressure</td>
</tr>
<tr>
<td>• Explicitly prioritized engagement from marginalized communities</td>
<td>• Distrust between community and the city/MPD</td>
</tr>
<tr>
<td>• Increased community representation on workgroup and in workshops</td>
<td>• Difficult to collect demographic information during crisis response</td>
</tr>
</tbody>
</table>
Significant Findings

- Across both surveys, many respondents expressed that they called 911 for help, even though they were uncomfortable with it. For many, the discomfort comes from the association of police response when it is not wanted.
- Protection of self or others, particularly for Black, Indigenous, and People of Color (BIPOC), was identified as a reason that issues were not reported or police presence was not desired when reporting.
- Excellent customer service and empathetic treatment are desired, regardless of incident type.
- Autonomy was a major theme. Respondents want a choice in the type of response they receive.
St Louis—Putting the Public Back in Public Safety
Center for Policing Equity Report Findings

- The number of use of force incidents per year decreased 18.2 percent between 2012 and 2019.
- Black people were subjected to force 4.3 times as often as White people per year.
- After accounting for crime rates, poverty rates, and neighborhood demographics, Black people were subjected to force 3.3 times as often per resident as White people.
- Black people, who make up 47.5 percent of the population of the City of St. Louis, made up 65.4 percent of all drivers stopped in the report period.
- White people, who make up 42.9 percent of the population of the City of St. Louis, made up 32.3 percent of all drivers stopped in the report period.
- The total number of pedestrian stops per year decreased 82 percent between 2012 and 2019.
- Black pedestrians were stopped 2.3 times as often as White pedestrians per year on average.

Recommendations

1. Invest in Youth Programming
2. Strengthen IPV Response
3. Engage Community in the Development of Public Safety Strategies
4. Expand the Use of Place Based Technology

Establish alternative response function(s)

Establish a Community-centered review of the Civilian Oversight Board
Moving Toward Community-Centered Solutions Equitably

- 911 Diversion
- Cops & Clinicians (co-response)
- Civilian Response
- Juvenile Diversion (Youth Violence Prevention Partnership)
- Violence Interruptions
- Community Violence Interventions
Presentation Outline

I. Welcome and introductions

II. Strategies to decrease racial disparities and implement programs with equity

III. Local examples of prioritizing race equity in the development of criminal justice and behavioral health programs

IV. Facilitated discussion with local leaders

V. Questions and answers
Presentations: Racial Equity Themes

• How race equity was centered in their work to launch this initiative

• The impact of current racial disparities on their efforts

• How communities most harmed by current systems have been involved in the work

• How they hope this work will lessen disparities and lead to more equitable outcomes

• The intersections of equity, health, and justice
