Justice Reinvestment Initiative

A data-driven approach to improve public safety, reduce corrections and related criminal justice spending, and reinvest savings in strategies that can decrease crime and reduce recidivism

The Justice Reinvestment Initiative is supported and funded by the U.S. Department of Justice's Office of Justice Programs' Bureau of Justice Assistance (BJA), The Pew Charitable Trusts, and Arnold Ventures.

4 Prison High Utilizers

5 Next Steps

New Hampshire Phase II

Extended analysis of state prison data and behavioral health-related Medicaid claims; technical assistance for implementing administrative policies recommended in Phase I

Goals

1. Expand the Phase I data match between the state corrections population, Medicaid, and the county jails.
2. Conduct intensive stakeholder engagement.
3. Support New Hampshire in the development of stabilization centers.
4. Support DHHS and the county jails in increasing care coordination.
5. Work with stakeholders on data coordination and monitoring outcomes.

Phase II Update

The Crisis Receiving Center (CRC) Technical Assistance group began meeting. CSG Justice Center staff met with both Community Mental Health Centers opening CRCs.

The Working Group members were convened for the first meeting on February 13.

Phase II Implementation Working Group

A smaller **implementation working group** composed of agency staff and appointed by state leaders is being established to discuss and direct progress in implementing administrative policies from Phase I.

Data Submission and Matching Process

Summary of NH DOC Data Provided (FY2014–FY2023)

Files	
State Prison Monthly Population Snapshots*	Earned Time Credit
State Prison Admissions*	Disciplinary Reports
State Prison Releases*	Programming
Parole/Probation Monthly Population Snapshots*	Mental Health/Substance Use Disorder Alerts
Parole/Probation Admissions*	Probation and Parole Violations
Parole/Probation Releases*	

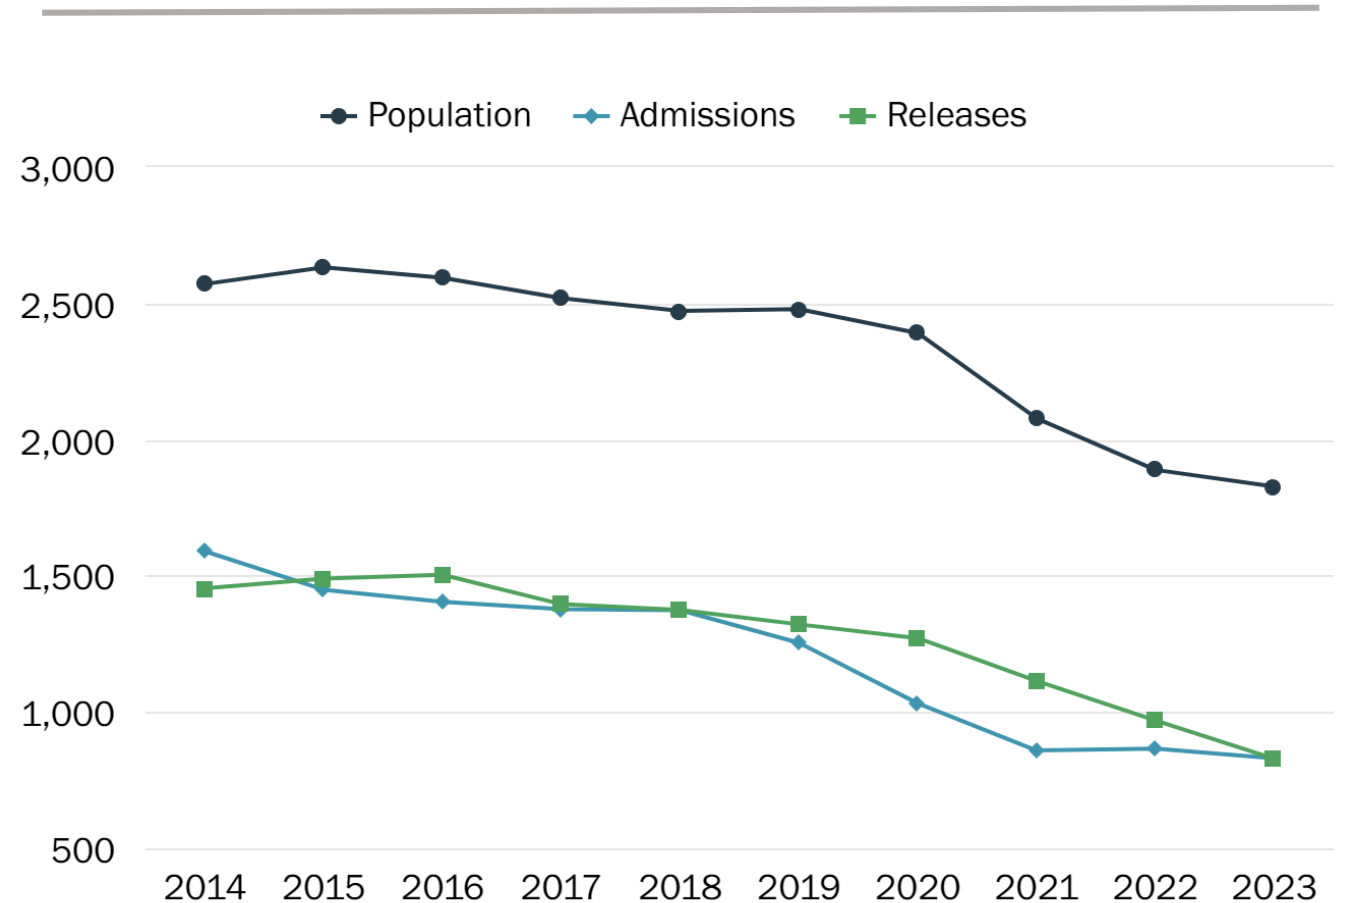

**Two file versions: Limited file required for DHHS to conduct the Medicaid match and detailed file for the CSG Justice Center analysis*

Notable Reductions in the State Prison Population

From FY2014 to FY2023, the NH state prison system saw decreases in the average monthly state prison population, admissions, and releases.

These trends may be partially attributed to the impacts of COVID-19.

Average Monthly State Prison Population, Admissions and Releases, FY2014–FY2023

The average monthly state prison population decreased **29 percent** from FY2014 to FY2023.

Average Monthly State Prison Population, FY2014–FY2023

Average Monthly State Prison Population by Controlling Offense, FY2014–FY2023

There were decreases in the average monthly state prison population for every controlling offense type from FY2014 to FY2023.

- ↓ **-19% Decrease**
Average Number of People in Prison for Personal Controlling Offenses
- ↓ **-55% Decrease**
Average Number of People in Prison for Property Controlling Offenses
- ↓ **-23% Decrease**
Average Number of People in Prison for Drug or Alcohol Controlling Offenses

Controlling Offense: The primary offense or the most serious charge that is responsible for a person's incarceration.

Distribution of the Average Monthly State Prison Population by Controlling Offense, FY2014–FY2023

The composition of the state prison population is shifting more toward a population serving time for personal controlling offenses.

Source: CSG Justice Center analysis of New Hampshire DOC data from December 2023 to June 2024. Offense types were categorized by NH DOC.

Next Steps to Better Understand State Prison Population Trends

- 1** Continue to analyze the reasons behind increasing proportion of people in state prison for personal controlling offenses.
 - Lengths of stay and the nature of personal controlling offenses.
 - Decreases in property and drug or alcohol crimes.
 - Impact on prison turnover and capacity.
 - Policies that impact public safety.
- 2** Analyze drug and alcohol alternative measures through stakeholder engagement.

The CSG Justice Center created a substance use disorder (SUD) flag based on certain criteria.

Tracking of mental health and substance use disorder exists in NH prisons but was not able to be shared as it is maintained in electronic health records, externally to the offender management system.

Someone was flagged for having an SUD if they had one of the following:

1

Had at least one drug or alcohol controlling offense between FY2014 and FY2023.

2

Had at least one enrollment in an SUD-related program between FY2014 and FY2023.

3

Had at least one state prison alert for SUDs between FY2014 and FY2023.

4

Had at least one disciplinary report for drugs or alcohol between FY2014 and FY2023.

The creation of an SUD flag revealed that 59 percent of the prison population in FY2023 had a history of SUD between FY2014 and FY2023, however, this is likely a low estimate.

Drug or Alcohol Controlling Offense

Percentage of Average Monthly State Prison Population in FY2023

This data does not account for concurrent lower-level drug offenses, often omitted in primary offense records.

SUD Flag:

- Drug or alcohol controlling offense
- Drug or alcohol disciplinary report
- SUD prison alert
- SUD program enrollment

Substance Use Disorder Flag

Percentage of Average Monthly State Prison Population in FY2023

After incorporating SUD flags, the proportion of people in prison jumps from 15 percent to 59 percent.

***Likely still a low estimate** due to missing data in state prison alerts and state prison program enrollments.

This reveals that a substantial portion of the state prison population is affected by SUDs, which a controlling offense analysis might overlook.

Most of the average monthly state prison population in FY2023 was White, male, and over the age of 24.

Distribution of the Average State Monthly Prison Population by Demographic in FY2023

Race and Ethnicity

Gender

Age Category

New Hampshire state prisons experienced an aging trend between FY2014 and FY2023.

Average Distribution of the State Prison Population by Age, FY2014–FY2023

In FY2023, **23 percent** of the average monthly prison population was 55 years or older.

↑ 64 percent increase from 10 years ago.

Source: CSG Justice Center analysis of New Hampshire DOC data from December 2023 to June 2024.

Caring for an Aging Population

Aging Impact: Older individuals in state prison often face unique challenges related to physical and mental health. As the population ages, health care needs and associated costs will increase.

Health Care Costs: According to the NH DOC Annual Report in 2021, people 60 years and older had an average of \$3,663.36 in medical costs per person, compared to \$1,420.34 per person for people 20 to 29 years old.

People in State Prison with Hepatitis C: Although older people on average have higher medical costs, certain expensive medical conditions, like Hepatitis C, also contribute greatly to health care expenditures. Treatments for such conditions are costly, and when younger people require them, it can offset the general trend of higher costs being primarily due to older people.

NH had higher racial and ethnic incarceration disparities than the nation in 2022.

Black, non-Hispanic People

Black, non-Hispanic people were incarcerated at

4.9x the rate of White, non-Hispanic people in state prisons nationally and

5.7x the rate of White, non-Hispanic people in New Hampshire state prisons.

Hispanic People (Any Race)

Hispanic people (any race) were incarcerated at

1.4x the rate of White, non-Hispanic people in state prisons nationally and

1.9x the rate of White, non-Hispanic people in New Hampshire state prisons.

* 2022 is the most recent publicly available data on persons in state and federal prisons.

The Relative Rate Index (RRI) is a statistical tool for measuring disparities in events like incarceration rates among various racial or ethnic groups, typically using the White population as the baseline for comparison. This index is derived by dividing the percentage of a specific group within the prison population by their percentage in the overall population. An RRI value exceeding 1 signifies that the group is overrepresented in the prison system compared to their population size. Source: CSG Justice Center analysis of New Hampshire DOC data from December 2023 to June 2024. CSG Justice Center analysis of 2020 Census data. Ann Carson, "Prisoners in 2022 – Statistical Tables", Bureau of Justice Statistics, <https://bjs.ojp.gov/library/publications/prisoners-2022-statistical-tables>.

Disparities in NH State Prisons 2022

Accounting for Population Sizes in the Community

White, non-Hispanic People

For every 10,000 White people in the community, there were 15.8 White people in NH state prisons.

Hispanic People (Any Race)

For every 10,000 Hispanic people in the community, there were 30.5 Hispanic people in NH state prisons.

Black, non-Hispanic People

For every 10,000 Black people in the community, there were 90.0 Black people in NH state prisons.

* 2022 is the most recent publicly available data on people in state and federal prisons.

The Relative Rate Index (RRI) is a statistical tool for measuring disparities in events like incarceration rates among various racial or ethnic groups, typically using the White population as the baseline for comparison. This index is derived by dividing the percentage of a specific group within the prison population by their percentage in the overall population. An RRI value exceeding 1 signifies that the group is overrepresented in the prison system compared to their population size. Source: CSG Justice Center analysis of New Hampshire DOC data from December 2023 to June 2024. CSG Justice Center analysis of 2020 Census data. Ann Carson, "Prisoners in 2022 – Statistical Tables", Bureau of Justice Statistics, <https://bjs.ojp.gov/library/publications/prisoners-2022-statistical-tables>.

Why This Matters

Despite the majority white population in New Hampshire, the incarceration rates reveal large racial and ethnic disparities, with Black and Hispanic individuals being disproportionately represented in state prison relative to their population sizes in the community.

Similar disparities were found in the New Hampshire county jails. In 2020, Black individuals were 6.2 times more likely and Hispanic individuals 2 times more likely to be incarcerated in county jail compared to White individuals, when accounting for their population sizes in the community.

These findings suggest a need to address and rectify these imbalances with a better understanding of what contributes to disparities.

State prison admissions decreased **48 percent** from FY2014 to FY2023.

State Prison Admissions, FY2014–FY2023

↓
From FY2018 to FY2023, there was a **40 percent** decrease in state prison admissions.

Source: CSG Justice Center analysis of New Hampshire DOC data from December 2023 to June 2024.

State prison admissions decreased across admission types from FY2014 to FY2023, but **parole revocations** are still driving most admissions. Forthcoming analysis will focus on revocation rates.

State Prison Admissions by Admission Type, FY2014–FY2023

*Forthcoming Analysis on Parole Revocation Rates

Additional analysis will explore revocation rate, comparing the volume of revocations to the total parole supervision population, as well as exits from parole supervision, to provide a comprehensive view.

We will continue to explore what contributes to parole success through additional data analysis and extensive stakeholder engagement.

Although admissions have decreased, parole revocations have remained a substantial contributor to New Hampshire's state prison admissions.

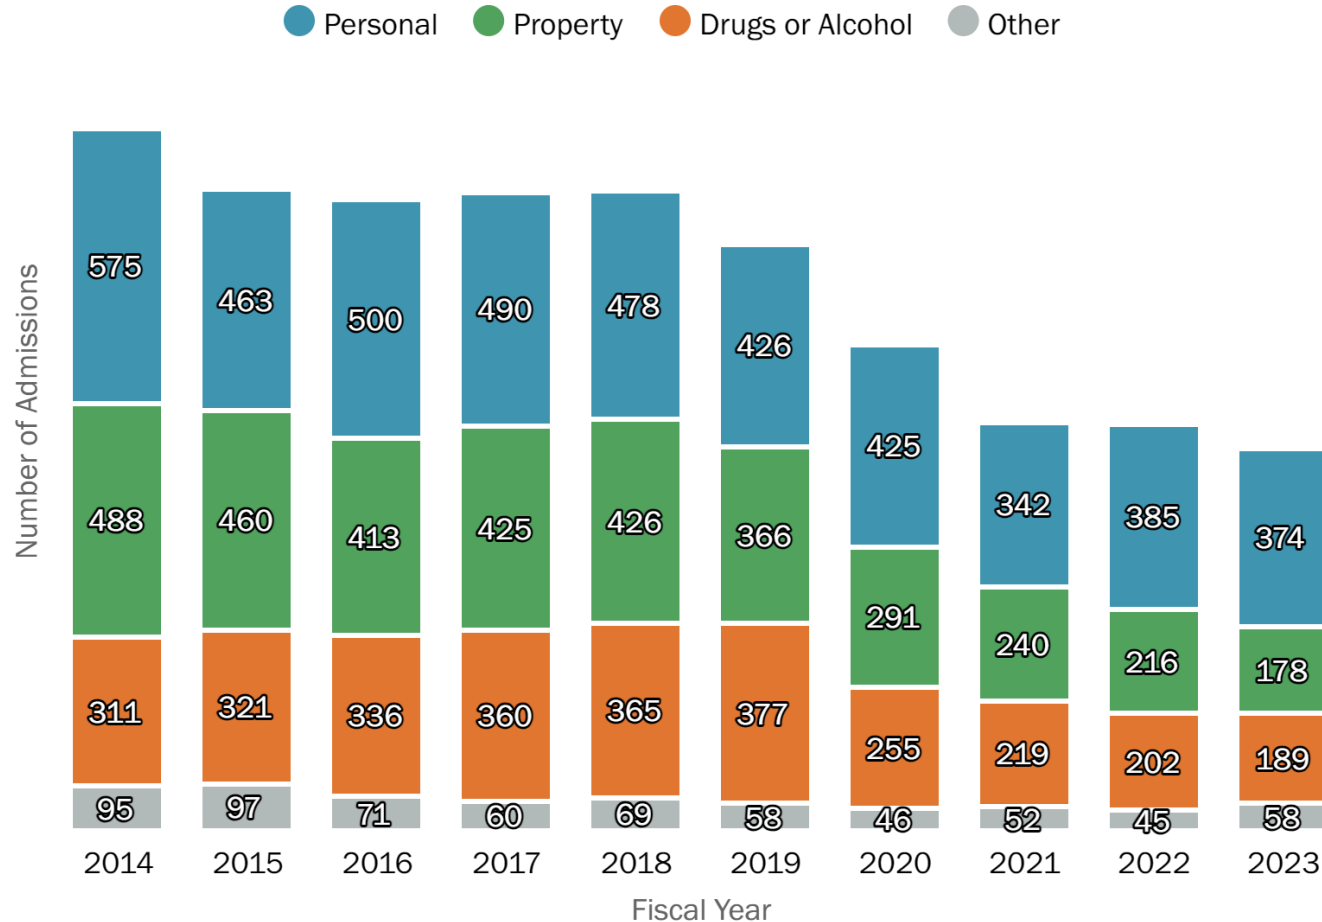

Strategies should be explored to enhance support for people on parole, aiming to reduce revocations through successful reintegration.

Active engagement with the parole board and field services is underway to better understand what contributes to parole success.

State Prison Admissions by Controlling Offense, FY2014–FY2023

There were decreases in state prison admissions for every controlling offense type from FY2014 to FY2023.

↓ **-35% Decrease**
Personal Controlling Offenses

↓ **-63% Decrease**
Property Controlling Offenses

↓ **-39% Decrease**
Drug or Alcohol Controlling Offenses

70 percent of people and 77 percent of admissions linked to at least one mental health or substance use disorder (MH or SUD) flag* between FY2014 and FY2023.

Percentage of People Admitted to Prison and Percentage of Prison Admissions Linked to at Least One MH or SUD Flag, FY2014-FY2023

***Mental health or substance use disorder flag includes:**

- Drug or alcohol-related controlling offense, drug or alcohol-related disciplinary report or prison alert
- Mental health-related prison alert
- Enrollment in a drug, alcohol, or mental health-related program, including earned time credit programs

Why This Matters

The large proportion of people admitted to state prison with MH or SUD flags indicates the underlying needs of the state prison population and the behavioral health dynamics at play.

This reinforces the assumption stakeholders have made that there is a strong tie between mental health, substance use disorder, and involvement in the criminal justice system within New Hampshire.

As more is uncovered, the questions we should be asking are how can we better serve this population, and what other interventions can be implemented to reduce these proportions?

Summary

Declining State Prison Populations, Admissions, and Releases

From FY2014 to FY2023, the state prison system saw a notable reduction in average monthly state prison population numbers, admissions, and releases, indicating shifting correctional patterns.

An Aging State Prison Population

The state prison population is getting older, which poses unique challenges due to increased health care needs and associated costs.

Parole Impacts

Parole revocations accounted for 51 percent of prison admissions in FY2023, indicating a need for additional analysis on parole revocation rates and stakeholder engagement about the parole system.

High Prevalence of MH and SUD Flags

77 percent of state prison admissions were linked to people with mental health or substance use disorder flags between FY2014 and FY2023, highlighting the need for targeted behavioral health interventions.

4 **Prison High Utilizers**

5 Next Steps

People who were High Utilizers (HU) Definitions

County Jail High Utilizers

People who entered county jail 4 or more times in any of the 9 participating county jails (Belknap, Carroll, Cheshire, Coos, Hillsborough, Merrimack, Rockingham, Strafford, Sullivan) from FY2019 to FY2021.

County jail sentences are usually 365 days or less.

State Prison High Utilizers

People who entered state prison 3 or more times to any of the NH state prisons (NH State Prison for Men, Northern NH Correctional Facility, Community Corrections, NH State Prison for Women) from FY2014 to FY2023.

State prison sentences are more than 365 days.

People Who Were State Prison High Utilizers from FY2014 to FY2023

**1 out of 6 People
Admitted to Prison**

were state prison high utilizers from FY2014 to FY2023

1 out of 3 Admissions

were by people who were state prison high utilizers from FY2014 to FY2023

Number of People who were State Prison High Utilizers

4,281

Number of Admissions by People who were State Prison High Utilizers

3–9

Number of Admissions per People who were State Prison High Utilizers

4

Median Number of Admissions per Person who was a State Prison High Utilizer

Length of stay analysis is in process.

State Prison Non-High Utilizers

Number of People = 5,493

State Prison High Utilizers

Number of People = 1,161

Prison Admissions

Percent of All Admissions

People who are prison high utilizers accounted for an average of **39 percent** of all prison admissions between FY2014 and FY2023.

Parole Revocations

Percent of All Admissions

People who were prison high utilizers accounted for an average of **59 percent** of all prison admissions due to parole revocations between FY2014 and FY2023.

New Court Sentences

Percent of All Admissions

People who are prison high utilizers accounted for an average of **14 percent** of all prison admissions due to new court sentences between FY2014 and FY2023.

Drug or Alcohol Controlling Offenses

Percent of All Admissions

People who are prison high utilizers accounted for an average of **40 percent** of all prison admissions due to drug and alcohol controlling offenses between FY2014 and FY2023.

People who were state prison high utilizers were **1.4 times more likely** to have an MH or SUD flag compared to non-high utilizers.

Non-High Utilizers

Percentage of State Prison non-High Utilizers with an MH or SUD Flag at Any Time, FY2014–FY2023

State Prison High Utilizers

Percentage of Prison High Utilizers with an MH or SUD Flag at Any Time, FY2014–FY2023

State Prison High Utilizer Summary

Preliminary findings indicate that this group has substantial needs and could benefit from increased support aimed at addressing their underlying needs, ultimately aiming to mitigate their risk of reoffending.

1. Had a Cycle of Reentry

1 out of 6 people were prison high utilizers but they accounted for 1 out of 3 prison admissions from FY2014 to FY2023.

2. Were Primary Contributors of Admissions due to Parole Revocations

People who were high utilizers accounted for 59 percent of prison admissions due to parole revocations from FY2014 to FY2023.

3. Had a High Prevalence of MH and SUD Flags

An overwhelming 92 percent of people who were prison high utilizers were flagged for mental health or substance use disorder from FY2014 to FY2023.

4. Were Major Drivers of Drug or Alcohol Controlling Offenses

People who were prison high utilizers accounted for 40 percent of prison admissions due to drug or alcohol-related controlling offenses from FY2014 to FY2023.

New Hampshire

Overview

1 Introduction

2 Technical Assistance Update

3 Prison Analysis

4 Prison High Utilizers

5 Next Steps

What's Next?

Additional analysis will include more findings using the DOC data and new insights from the DHHS data.

High Utilizers

- State prison and county jail high utilizers
- Jail high utilizers' journeys

DOC Data

- Community supervision
- Revocation rates
- Earned time credits
- Disciplinary reports
- MH and SUD Flags
- Length of stay
- Racial, ethnic, and gender disparities
- Costs
- Success trends

DHHS Data

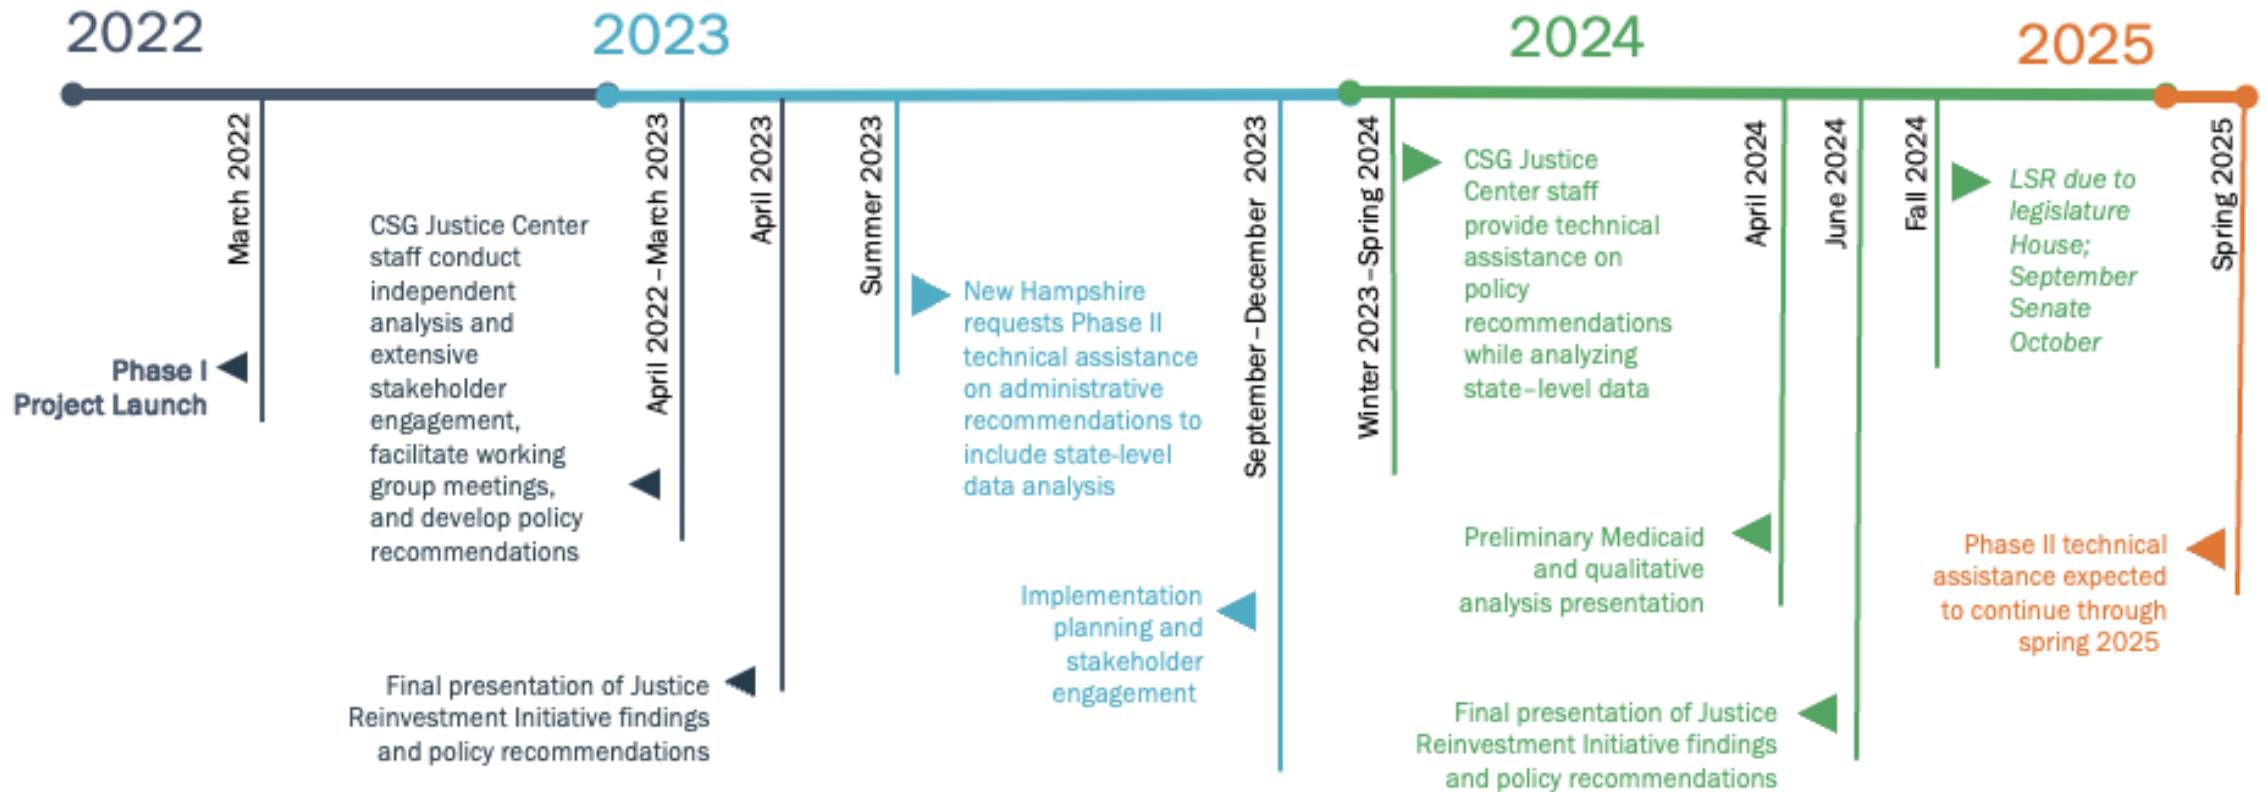

- Service utilization
- Primary disorders
- Emergency department visits
- Community Mental Health Center visits
- Homelessness at time of enrollment
- Reimbursement costs to service providers
- Service costs
- Services associated with success

Qualitative Assessment Plan

In addition to the data analysis, CSG Justice Center staff will complete a qualitative assessment to complement the analysis and collect diverse perspectives from agency staff and impacted people.

Focus Groups	Department of Corrections Medical/Behavioral Health/Programs
	Community Supervision
	Formerly Incarcerated/Supervised People
	Department of Corrections Division of Rehabilitation Services
